

## ASSIGNMENT #4:

**Medium: Graphite HB, 2B Size:18" x 24"**

Create a 2 point perspective drawing of a room at home. Be sure to include all of the furniture in the room as well, as any objects on the furniture, such as lamps, books, clocks etc.

Remember to measure to find the angles and then look where the angle will intersect the eye level. This is how you will find the vanishing point when drawing an observational 2 point perspective drawing.
